Simply stated, "Healing" by Francis MacNutt may be the best work on healing through prayer ever written. The book includes an overview of the history of praying for healing in Christianity. That in itself is worth the price of the book. He traces how healing began as a central obligation of early Christian communities, but when Christianity became legal under Constantine, many of the precepts of pagan Roman society, such as those advocated by stoics, which deemed suffering as redemptive, infiltrated Christian theology and practice. People prayed less and less for healing as time progressed and saw their suffering as something they should endure without questions, for redemptive reasons. Also the role of the laity changed much once Christianity became legalized. Priests became more powerful and certain practices that were once considered the responsibility of all, such as praying for the sick (which is handed down in the Catholic tradition as the anointing of the sick) were no longer responsibilities that any Christian should perform, but relegated to those ordained.MacNutt's book includes many personal testimonies of people who were healed through services at which he participated. Some of the stories come from letters. Some of the stories are his

personal experiences and situations that he witnessed. All areas of healing are included: inner healings from emotional wounds, physical healings and deliverance is also a topic the book covers. The book includes sample prayers used from various Christian faiths, or elements that should be incorporated into prayers, if the reader has an aversion for formal prayers.
