Whoever is translating these books, please take the work seriously. Your translation has multiple misspelled words, incorrect word choices, and issues with the printing process which has caused some pages to become faded and blurry like some elementary school project. Everyone wants this franchise to succeed and these very simple very real problem are not helping.

I love these stories, but I'm getting sick and tired of the bad translations. Typos is one thing, but things like translating 'console games' as 'consumer games', totally missing the point about German names and forgetting words entirely are quite another. The English publisher really needs to get an editor, preferably a bilingual one.

I really love reading this series. I love the characters and how they changed it from the web novel. While I do like this series I do have to agree with everyone else that there either needs to be a new translator or someone to double check everything. The translation is alright and I can understand what the story is saying but, it could be better.

So again we catch up with our main character who is fighting to survive in a world that he was summoned to as a hero. The story line just keeps getting better as we are starting to learn more about what is actually going on with our main character and why he is leading the way in his quest to survive and return home to his world. I have read the first 4 volumes each at least twice and I have already read this one at least that many times already. Now I just have to wait for volume 6 to be released. I can't wait.

There are a lot of spelling mistakes in this book. The publisher needs to be more serious about editing. The content of the book is still engaging as the previous ones

Finally Naofumi is getting respect. But, this book is more about trying to fix the rift between him and the heroes and plot progression. Also, there are more "boss enemies" introduced, though I am hesitant to call them villains personally. That's all I am going to say for fear of spoiling.

Found the story great and loved how the book was anywhere from about 50 to 100 pages longer than the previous books. I noted that in this book and the previous ones in the series there would be a mistyped word such as using "be" instead of "me" I haven't noticed many but as I get enticed by reading I read the 400 page book in around 8 hours
