Here is a book that should be found in the library of every evangelical theologian, theology student, and pastor today. Without question, this is one of the most thorough and complete one-volume dictionaries of theology presently available--all of this from an evangelical perspective!! The international cast of contributors (predominantly from North America, Australia, and the UK), under the editorial supervision of Dr. Elwell of Wheaton College, have assembled a remarkable wealth of information. The theologically-inquisitive will find within this volume a fairly substantial summary of almost any theological issue that one might wish to investigate (and several that one might never even think to investigate). Multitudinous articles, appearing in alphabetical order, provide summaries of events, movements, issues and concepts, personalities, terminology, etc. that have in some way contributed to the shape of Christian theology. Even the "insignificant" things are included. In addition, the brief bibliographies that appear at the end of each article provide the reader with some idea of where to turn for further inquiry. One of the greatest strengths of this volume is that, while decidedly evangelical in perspective, its content is not narrowly dogmatic in orientation. Its

contributors reflect a diversity of theological persuasions and convictions. However, in this day in which "globalization" has become a very real and important influence on the scope of evangelical theology, one criticism of this text is that it is largely Western in its orientation. There are few contributors from non-Western nations.

Other than Scripture, this is the book most often pulled off my shelf and referred to in my studies. This is not to be confused with the Baker Theological Dictionary, which is a slightly condensed version of EDT. Dr Elwell is a respectable conservative evangelical scholar who has produced many scholarly and lay writings centering on dictionary/encyclopedic collections of theological/Scriptural information. He is a professor of biblical studies and theology at Wheaton College Graduate School. The book covers a plethora of topics from orthodox Scriptural ideas set forth by theologians, synopses of Scripture's teachings on topics, heresies and author/theologian biographies. The writings span from 1/2 page to 4 pages with most articles dealing very well with topics from a conservative Scriptural standpoint. A leader of that field's specialist writes each article, with well over 300 different authors providing insights on topics. Each article gives a brief bibliography, and cross-reference to related topics. Most of the longer topics spanning multiple pages offer a summary at the end, for those not interested in in-depth study of all aspects of a topic.
