Algebra II, Grades 5 - 8 (The 100+ Series™)

Synopsis

A top-selling teacher resource line, The 100+ Series(TM) features over 100 reproducible activities in each book! Algebra II links all the activities to the NCTM Standards and provides students with practice in the skill areas necessary to master the concepts presented in a second-level course in Algebra. Review concepts presented in beginning algebra plus exercises that involve slope, intercepts, graphing linear inequalities, domain and range, graphing exponential functions, matrix operations, quadratic equations, trigonometry, radicals, roots, vectors and more. Within the skill-specific assignments, examples of solution methods are presented at the top of each page and puzzles and riddles gauge the success of concepts learned. The numbers of the related standards for each activity can be found in the table of contents. An answer key is also provided.

Book Information

Series: The 100+ Series™

Paperback: 128 pages

Publisher: Instructional Fair; Revised edition (April 15, 2003)

Language: English

ISBN-10: 0742417891

ISBN-13: 978-0742417892

Product Dimensions: 8.5 x 0.3 x 10.8 inches

Average Customer Review: 4.2 out of 5 stars See all reviews (9 customer reviews)

Best Sellers Rank: #690,069 in Books (See Top 100 in Books) #83 in Books > Children's Books > Education & Reference > Math > Algebra

Age Range: 10 - 14 years

Grade Level: 5 - 8

Customer Reviews

This is a very good supplementary workbook for many of the common Algebra II topics. Unfortunately, the title is only "Algebra II"-- and not all second-year topics are covered, e.g. matrices. It also does not go as far into conic sections and logarithms as some texts do. On the other hand, almost 25% of the book is devoted to trig calculations that are not covered in a regular algebra II class. And a publisher's mistake on the cover that is a doozie--the cover says this book is for "Math grades 5-8" instead of grades 10-11!

I homeschool in the example that they have are not good example at all they do not show you how to work out a problem..

I am a high school math teacher and love this series. So do the students!

Great teaching supplement.

This book makes Algebra look appealing for those who really don't have a feel for it.
