Customer Reviews

I wouldn't really call this a Daily Skill Builder. The concepts are not developed adequately for a child to independently understand how to complete the skills and there are not enough exercises to provide adequate practice to learn the skills, so I would classify it more as a very excellent review for Pre-Algebra students. It does have a very good selection of Pre-Algebra concepts presented in a logical sequence. One half page is devoted to each concept. There is not always enough room on the half page to work out the problems if you are looking for a workbook format. This was not a negative for me because I was more pleased to see the space devoted to presenting a good variety of skills.
